

UNA USA SoCAL DIVISION

invites you to

A showing of “Dr. Keeling’s Curve” by George Shea

Staring Mike Farrell as Dr. Keeling

UNA USA SoCAL Division Meeting
Hosted by San Fernando Valley Chapter

Saturday, June 24th noon to 3:00 PM

Red Moon Restaurant

12516 Riverside Drive, No. Hollywood, CA 91607

(parking adjacent but carpooling recommended)

In 1955 Keeling was the first scientist to successfully measure carbon dioxide in the Earth's atmosphere. He continued to measure CO₂ for the next 50 years despite indifference and opposition from U.S. government agencies that failed to understand the importance of his work. Today, in the National Academy of Science in Washington, D.C., the Keeling Curve stands beside Darwin's finches and the double helix of DNA as the scientific icon that most clearly illustrates the steady rise of CO₂ in Earth's atmosphere.

Post screening join us for IN PERSON Q&A with Mike Farrell and playwright, George Shea

Cost \$20 per person with reservations requested by June 23rd
